ABOUT CATALINA GRAPHIC FILMS

Founded in 1968 as Catalina Plastic Suppliers, Inc., Catalina started business as a distributor of non-pressure sensitive plastic sheets and films.

In 1972, the Company purchased its first pressure-sensitive adhesive coating line and became Catalina Plastics and Coating. The core business became the distribution of pressure sensitive coated plastics and films printed by offset and screen processes.

After 30 years in business, the Company has built its reputation upon high quality products and service.

Today, its products are used in a wide variety of niche applications printed by almost all disciplines including digital, screen, offset, flexo and gravure.

After more than 30 years in business, Catalina changed its name to Catalina Graphic Films to more accurately reflect the Company's current focus and direction.

History and success have evolved our mission as well. Today and in looking to the future in the new millennium, we operate by the following Mission:

"Catalina Graphic Films is dedicated to being the premier custom coater of Pressure Sensitive materials for the Digital, Offset, Screen, Industrial and Specialty markets.

The Company will maintain a positive work environment to train and retain the highest caliber employees to meet increased internal and customer requirements. Our goal is to be THE source for application knowledge for our customers.

Catalina will continue to value relationships with only the highest quality suppliers to meet increased company and customer requirements. We continue to invest in equipment, technology and processes to provide our customers with high value application solutions for an ever changing market."
